

G. A. F. HEADQUARTERS, PARKS AND DEPOTS IN THE WEST

1. The four maps accompanying these particulars of G.A.F. Targets in the West give the known locations of Headquarters, Depots, Parks, and Workshops (excluding Norway and South France but including Western Germany) in the following classes:-

- (i) Operational Headquarters
- (ii) Administrative Headquarters
- (iii) Depots holding Supplies and Equipment
- (iv) Workshops for Aircraft Repairs

2. In Maps (i), (ii) and (iii) the targets which have been pinpointed are underlined in red. As regards Map (iv), the precise positions of the Front Repair Workshops and Aircraft Repair Workshops on Airfields are nearly all easily ascertained.

3. Schedule 2 (Targets approximately located, but not pinpointed) provides lists of the targets where the actual pinpoint is not yet ascertained.

4. It will be seen that every G.A.F. operational and administrative higher Command at present situated on the Western Front is included, either in Schedule 1 or Schedule 2, nearly all in the former.

5. Any further information forthcoming will be issued in the form of an amendment.

6. It should be pointed out that, while the disorganisation caused by attacks on one or two of the pinpointed targets might not have a marked effect on events, successful attacks on a large proportion of them would probably have a serious effect, owing to cumulative disorganisation.

9. It may be remarked that the target most essential to the administration and organisation of the G.A.F. is the Luftgau Headquarters at ETAMPES.
